

## English

Children will develop a variety of skills through reading and analysing 'Boy in the Girls Bathroom' by Louis Sachar. This text explores the life of a child who doesn't always fit in. Exploring the ideas of friendship, it raises awareness of celebrating our differences.

Children will explore the themes within this book both in their English lessons and within our guided reading sessions. They will look closely at creating character descriptions together with the key questions that evoke debate. The children will carry out drama sessions to develop their speaking and listening skills. Finally, they will look at instructional writing.

## DT

### Cooking and Nutrition

Children will learn about the importance of a balanced meal. Design and create a recipe for Spaghetti Bolognese. Children evaluate their recipe and how to adapt it for the future.

## Geography North America

We will be looking at the continent of North America. Within this, we will look at both the physical and human features within the continent. We will also look at how humans have impacted upon the continent and what effect this has had upon the population. We will be using an atlas, maps and Google Earth, together with Digimaps to discover more about the location of the countries within the continent and finally comparing this with the UK.

## School Value Responsibility

Taught through weekly circle time sessions, classroom displays and our classroom and school ethos.

## Great Chart Primary School Year 5, Term 3

## MFL

Shopping-Language around food, numbers and colours to support visiting a French cafe.

## RE

Sikhism

We will look at stories within Sikhism, including Guru Nanak, Malik Bhago and Lalo.

## PSHE

Ambition

What would you like your future to look like?  
What careers would you like to pursue?  
How does money impact your choice?

## Maths

We will continue to develop the children's recall of times tables and to revise the 4 methods of computation. Flashbacks continue to revise all previous learning, on a daily basis.

### Multiplication

To multiply 2, 4 and 4 digit numbers  
Solve 2 and 3 step problems

### Division

To use bus stop method  
To solve division with remainders  
To solve 2 and 3 step problems with division

### Fractions

Fractions of amounts  
Multiplying fractions

## Science - Properties and changes of materials

Conductors  
Insulators  
Electrical conduction  
Dissolving  
Separation  
Irreversible changes

## PE - Gymnastics and Football.

Gymnastics- Creating a six part sequence. Looking at round off, bridges, balance and symmetry.

Football- Children will learn skills and tactics before playing the game and developing strategy and teamwork

## RHE

Healthy body and Mind

The importance of:

Sleep  
Exercise  
Healthy Eating

Raising awareness of:  
Stress  
Drugs and alcohol

## ICT

Creating Music with Scratch  
Using loops and repetition..
